### Learning Objectives (Instructions for student and preceptor)

Describe 2-4 learning objectives to guide the student’s experience. Learning objectives are statements of what the student will **LEARN** as a result of their experience and activities. The learning objectives should be followed by a brief description of the activities to be performed to meet the learning objective. This format allows the student, preceptor, and advisor to see how the activities relate to what the student will learn as a result of performing the activity.

When the learning objectives and activities have been agreed upon between the preceptor, student, and the advisor, the student should complete the following section:

**Learning Objective:** **As a result of the specified activity, the student will be able to:** *(use verbs to demonstrate skills and knowledge to be learned)* such as: *analyze, synthesize, utilize, construct, develop, etc.*

**Activities:** Briefly describe the activities the student will do to achieve the learning objective. There should be a clear association between the learning objective and the activities.
1. Learning Objective

4. Learning Objective
   Activities

Describe how the combined activities will produce a product or services that will benefit the host organization:
