Overview

This report details the outcomes of Pitt Public Health’s master’s and doctoral students who graduated in December 2012, April 2013, June 2013, and August 2013.

The Office of Student Affairs obtained the majority of this data from our Recent Grad Survey, which is administered annually in October. Since not every student responded to the survey, we augmented that data by obtaining additional information from our departmental faculty and staff.

Of the 213 students who graduated in this time frame, we have outcomes data on 199 of them, which gives a response rate of 93%. Of those, 6 were not actively seeking employment and have therefore not been included in the charts. The following report details the career status and employment sector for the remaining 193 students.
