Overview

This report details the outcomes of Pitt Public Health’s master’s and doctoral students who graduated in December 2013, April 2014, June 2014, and August 2014.

The Office of Student Affairs obtained the majority of this data from our Recent Grad Survey, which is administered annually in the fall. Since not every student responded to the survey, we augmented that data by obtaining additional information from our departmental faculty and staff.

Of the 206 students who graduated in this time frame, we have outcomes data on 194 of them, which gives a survey response rate of 47% and an overall knowledge rate of 94%. Of those, 4 were not actively seeking employment and have therefore not been included in the charts. The following report details the career status and employment sector for the remaining 190 students.

<table>
<thead>
<tr>
<th>Department</th>
<th>Total graduates</th>
<th>Total knowledge rate</th>
<th>Total knowledge rate minus those who are not actively seeking employment</th>
<th>2013-2014 graduates who are employed, continuing education, or are completing a fellowship, internship, or post-doc</th>
