Office: A663 Crabtree Hall
Office Hours: By appointment

Introduction to Course
The Overview course provides a broad perspective of the public health field, including its professional ethics, problem solving approaches, and representative examples of the kinds of challenges you can expect to address as a public health professional.

Course Rationale
Recognizing that Pitt Public Health students come from rich and diverse careers and academic experiences, this Overview course is intended to create a common knowledge platform. The course is also designed to help students hone their communication and thinking skills through discussion and other course activities.

Course Objectives
This course will enable students to

1. Understand public health as a broad, complex and multidisciplinary domain of professional practice, advocacy and inquiry.
2. Describe the ASPH competencies of Public Health, both disciplinary-based and cross-cutting
3. Present a well-reasoned, evidence-based and compelling argument for a public health relevant policy, program or intervention using the public health problem solving steps.
Required Texts

2. On-line readings as assigned in the syllabus or added during the semester.

Recommended Supplementary Texts/Readings

5. Henderson, D.A. (2009). Smallpox - Death of a Disease: The Inside Story of Eradicating a Worldwide Killer (This book was selected as the “One Book – One Community” reading for the GSPH for 2009/10 in recognition of Dr. Henderson and his global team in the eradication of smallpox.)

CourseWeb/BlackBoard

CourseWeb (BlackBoard) will be used to provide access to lectures, assigned readings and communication between the instructor, TA and the students.

Evaluation of Course Performance

The student is required to complete the following to receive credit for satisfactory course completion (grade of B- or better):

1. Public Health Problem Solving Assignment
2. Achieve a passing grade on the Final Exam
3. Attendance and active participation in class (Including the completion of the on-line MPH Core Competency survey and the OMET on-line course evaluation)
**Factors and Weights**

Public Health Problem Solving Assignment 35% (September 24th)  
Final Exam 45% (October 8th)  
Attendance and active participation in class 20%  
(Including the completion of the on-line MPH Core Competency survey and the OMET on-line course evaluation)

**Letter Grade Scale**

<table>

<td>78-79%</td>
</tr>
<tr>
<td>C</td>
<td>70-77%</td>
</tr>
<tr>
<td>Fail</td>
<td>&lt; 70%</td>
</tr>
</tbody>
</table>

**Problem Solving Assignment**

Developing your solution to a current public health problem gives you an opportunity to demonstrate your thinking and writing skills and practice your ability to formulate a clear position on a public health issue. Apply the technique discussed in class to a public health issue, which has been in the media in the last three months. The problem solving steps to be used are: Define the problem, identify causal factors, select an intervention (evidence-based, if possible) and develop an implementation and evaluation strategy based on real world considerations and constraints. Use the logic model. The paper should be no longer than 5 pages double spaced with size 12 font and 1" margins at top/bottom and right/left sides. List all references at the end of the paper. You can use any reference style.

**Students will submit this assignment to the TA at the beginning or end of the class on September 24th.**

**Assignments Due**

All assignments are due by **the dates indicated on the course syllabus**. Late assignments will be accepted only under exceptional circumstances with justification and will be subject to a discounted grade.

**Final Exam**

The Final Exam will consist of a set of “objective” questions, e.g., multiple choice, true/false, etc. Emphasis will be placed on the lectures and required Schneider text; all assigned readings may be the basis for test items. The test will be administered open book, and open notes, but with a time constraint. Students will be given 1 hour to complete the final.
**Student Participation**

Students will attend the scheduled lecture each week and participate in class as required. Students will be permitted one excused absence for the lecture sessions. Any missed sessions in excess of this limit will result in the reduction of 10% in the student’s total score. The use of any electronic devices for none course activities during class will not be tolerated.

**Academic Integrity**

The Provost Office maintains a website that provides details on the Code for Academic Integrity; please see [http://www.pitt.edu/~provost/ai1.html](http://www.pitt.edu/~provost/ai1.html). This code includes obligations for faculty and students, procedures for violations and other critical information. You are encouraged to review this policy carefully as it will apply to all your course work in the GSPH. Violations of academic integrity are taken very seriously and may lead to sanctions including a failing grade on an assignment, exam and/or the course.

**Students with Special Needs**

If you have a disability for which you are or may be requesting an accommodation, you are encouraged to contact both your instructor and Disability Resources and Services (DRS), 140 William Pitt Union, (412) 648-7890/(412) 383-7355 (TTY), as early as possible in the term. DRS will verify your disability and determine reasonable accommodations for this course.
