

DEPARTMENT OF EPIDEMIOLOGY 2019 FALL SEMINAR

Thursday, October 10

12:00 — 1:00 pm , G23 Public Health Auditorium

**Role of Exercise in the Treatment of
Geriatric Obesity and Aging-Related Fat
Redistribution**

Barbara J. Nicklas, PhD

Professor, Gerontology and Geriatric Medicine,
Wake Forest School of Medicine

Dr. Nicklas' research interests focus on aging, exercise, inflammation, and body composition. She received her doctorate in exercise physiology from the University of Maryland College Park, and has served as faculty at the Wake Forest School of Medicine since 2001. Dr. Nicklas is the Deputy Director of the Sticht Center for Healthy Aging and Alzheimer's Prevention, as well as the Chair of the Wake Forest School of Medicine Clinical and Translational Science Institute's Program in Team Science.
