

The University of Pittsburgh Graduate School of Public Health has a long tradition of translating important research findings into groundbreaking public health advances that have improved lives throughout the Pittsburgh region and around the world. We consistently rank among the top 5 public health schools in the United States, as measured by NIH funding. We have attracted more than a billion federal dollars over the past decade for public health research. And our 5,000 plus alumni are having a profound impact on public policy related to a wide array of health issues such as occupational health, air quality, vaccination rates, protecting against HIV/AIDS, scheduled activity for school children, and more.

However, today we are at a crossroads. Our buildings have not had a substantial renovation since they were built and—although they are structurally sound—are in need of an infrastructure overhaul. To continue our legacy of producing great research and great researchers, we need to expand, update, and renovate. And to do so, we need your help.

HELP US BUILD A HEALTHIER FUTURE.

JOIN US IN BUILDING FOR A HEALTHIER WORLD.

Building for a Healthier World is a plan to address the growing needs of Pitt Public Health. Project highlights include:

A NEW STATE-OF-THE-ART LABORATORY PAVILION

This four-story pavilion includes 58,000 square feet of laboratory space contained on three floors with a common space overlooking Fifth Avenue to facilitate collaboration and cross-disciplinary discussion.

RENOVATION OF CRABTREE AND PARRAN HALLS

Extensive renovations will include updated audio/visual technology that is both smart and green, two large auditoriums, an advanced computer lab, a student lounge and café, offices, conference rooms, and a fourth floor outdoor courtyard.

PROGRAM RENOVATIONS

Pitt Public Health is envisioning programmatic renovations such as increasing open meeting spaces, consolidating classrooms, and reconfiguring offices to enhance learning, communication, and research capabilities.

The University of Pittsburgh together with the Commonwealth of Pennsylvania have allocated \$72 million to the project. To achieve our goals for *Building for a Healthier World*, the school needs to raise an additional \$15 million. With your help, we hope to complete a more functional, attractive, smarter, and greener environment for Pitt Public Health by spring 2016.

CREATE A LASTING LEGACY. CONTRIBUTE TO A HEALTHIER FUTURE.

There are many ways to make a gift in support of Building for a Healthier World. Naming opportunities include:

NAMING OF SCHOOL:

\$30 million – Naming of the Graduate School of Public Health

LABORATORY RESEARCH:

\$10 million – Laboratory pavilion

\$500,000 – Space for each: Human Genetics, Epidemiology, and Infectious Diseases and Microbiology Laboratory

\$250,000 – Each laboratory pavilion open collaboration area overlooking Fifth Avenue

\$250,000 – Freezer farm for biological specimens

\$250,000 – Cold room to facilitate research to be conducted at F 37-40 degrees

\$250,000 – Hot room to facilitate research to be conducted at human body temperature

LEARNING ENVIRONMENTS:

\$3 million – Fifth Avenue entrance reception area

\$2 million – DeSoto entrance reception area

\$2 million – 215-seat auditorium off Fifth Avenue

\$1 million – Student lounge

\$750,000 – 115-seat auditorium in Crabtree Hall

\$500,000 – Computer laboratory

\$500,000 – Fourth floor outdoor courtyard surrounded by Crabtree Hall offices and classrooms

\$250,000 – Each conference room

\$50,000 – Each classroom

CENTERS:

\$3 million – Center for Aging and Population Health

\$3 million – Center for Healthy Environments and Communities

\$3 million – Center for LGBT Health Research

\$3 million – Center for Health Equity

\$3 million – Center for Public Health Practice

\$3 million – Epidemiology Data Center

\$3 million – Public Health Dynamics Laboratory

Join Pitt Public Health as it educates future public health leaders while engaging in public health service and research. Your generosity is critical to the school's success. **For more information about making a donation, please contact:**
