APPENDIX C: Provost Maher’s memo regarding dossier preparation (January 14, 1998)

I. Introduction

This manual describes the policies and procedures for the appointment, promotion and tenure processes for faculty in the Graduate School of Public Health (GSPH). All policies and procedures follow the guidelines of both the University as described in the University Faculty Handbook (http://www.provost.pitt.edu/handbook/handbook.html) and those of the Graduate School of Public Health (http://www.publichealth.pitt.edu/interior.php?pageID’56).

The FAPTC was established in 1999 to comply with the University requirement: all individuals being considered for appointment or promotion must undergo a review by their peers. As a standing committee of the Graduate School of Public Health, its authority comes from the GSPH Council. Its function is to review and recommend actions to the Dean and GSPH Council for all GSPH primary faculty appointments and promotions.

II. Definitions of Faculty

A. APPOINTMENTS

1. Professor

The rank of Professor recognizes the attainment of authoritative knowledge and reputation in a recognized field of learning and the achievement of effective teaching skill. The Professor should have attained superior stature in their field through research, writing, professional practice, or leadership in professional and learned organizations, as well as having exceeded the standards described for ranks shown below.

2. Associate Professor

An Associate Professor should possess a doctorate or appropriate professional degree and have substantial experience in teaching and research or applicable professional experience. The person should show a capacity and will to maintain teaching effectiveness and the ability for continuing growth as a teacher, scholar, and member of their profession. They should also have progressed in attaining eminence in a scholarly or professional field. An Associate Professor must display consistently mature performance in course and curriculum planning, in guiding and counseling students and junior faculty members, and in participating in the activities of the University.

3. Assistant Professor

An Assistant Professor should evidence demonstrated teaching ability, substantial experience in advanced study and research, or professional experience of a kind which would enable them to make a comparable academic contribution. The
Assistant Professor should possess a doctorate or appropriate professional degree. They should exhibit promise of originality and excellence in some field connected with teaching, writing, or research and should have demonstrated ability in guiding and counseling students. To be appointed to an Assistant Professorship, a candidate should have the potential for promotion to Associate Professor.

4. Instructor

The Instructor should have an earned doctorate or the highest appropriate professional degree, or provide evidence that they are successfully pursuing such a degree and expects to receive it within a reasonable time. In some technical fields, professional experience may bear considerable weight; in other areas, teaching experience is essential. Reappointment depends upon satisfactory scholarly progress and a demonstrated interest in and ability to pursue an academic career.

5. Lecturer

A Lecturer is an “occasional” teacher whose responsibilities are limited and defined in the letter of appointment.

B. Appointments (with prefixes)

1. Visiting

Faculty whose appointment is on a temporary basis, usually for not more than one academic year.

2. Research

Faculty whose primary assignment or contribution is investigative and who is not ordinarily expected to undertake regular teaching responsibilities.

3. Adjunct

Faculty whose primary employment is outside an academic unit of the University, but who is fully qualified professionally and who performs on a part-time basis, duties that would otherwise be assigned to members of the full-time faculty.

4. Clinical

Faculty whose major contribution is as a preceptor of students and trainees in clinical skills, whether within the University or in another setting.

C. Appointments (with suffixes)

1. Public Health Practice
Faculty whose focus is on the applied, interdisciplinary pursuit of scholarship in the practice of public health. These faculty pursue practice-academic linkages, address the curricular needs of professional public health education, conduct research on practical problems and policy issues, and translate knowledge to practice through technical assistance, training, and consultation.

2. Public Health Education

Faculty whose focus is on educational advancement. These faculty promote public health education to students, professionals, and the general public as well as support and develop teaching programs and methods within the school.

III. Faculty Appointment, Promotion and Tenure Committee (FAPTC)

See also FAPTC section of GSPH Bylaws
https://www.publichealth.pitt.edu/bylaws

A. Committee Type and Composition

The FAPTC was established to comply with the University requirements for consideration of appointment and promotion of all GSPH faculty. It is a standing committee of the GSPH Council. It is composed of two elected faculty members from each department and the Associate Dean for Faculty Affairs. All members are at the rank of Associate Professor or above with at least six members having the rank of Professor and at least six members having tenure. None of the elected faculty can be a department chair. The chair of the FAPTC must be chosen from the faculty representatives serving on the committee at their first meeting of the academic year. The Associate Dean for Faculty Affairs serves as vice chair and as facilitator for the FAPTC in order to coordinate activities with the Dean’s office.

B. Terms of Office for Committee Members

The elected faculty members of the FAPTC serve three-year staggered terms. Elections to replace members whose terms have expired are held annually (see Section 9 of the GSPH Bylaws, http://mypublichealth.pitt.edu/Governance/Bylaws). Faculty elected to the FAPTC may serve two successive terms and, thereafter, only following an interval of three years after the completion of the second term. Once an individual is elected as the committee chair, the term of office as the committee chair continues until the individual’s term of office as a faculty representative to the FAPTC expires. An individual can serve repeated tenure as the committee chair as long as they are a faculty representative of the FAPTC. The Associate Dean for Faculty Affairs serves on the FAPTC as long as they hold this position.

C. Charge of the FAPTC includes:

- Maintain documentation of all policies and procedure guidelines or criteria that relate to all faculty level appointments, promotions, and tenure decisions and assure the faculty have access to this documentation.
• Update the FAPTC Operations Manual as appropriate, with full review and approval at least every five years or whenever major changes in the Graduate School of Public Health or University policy occur.

• Assure that all GSPH criteria for appointment, promotion, or tenure incorporate and/or are consistent with University policies and procedures.

• Maintain guidelines for discussion and voting within the committee which appropriately take into account conflict of interest and other ethical considerations.

• Upon request by the Dean or Department Chair, provide informal advice on proposed faculty actions prior to formal review of individual for primary appointment, promotion, or tenure.

• Review and recommend actions to the Dean and GSPH Council on all GSPH primary faculty appointments, promotions, and tenure.

• Provide oversight to assure full compliance with all guidelines regarding diversity and equal opportunity in faculty recruitment and appointment.

• Review and recommend actions relating to promotion and tenure on a monthly schedule that is published annually.

D. FAPTC Operations

• The FAPTC shall review and recommend actions relating to appointments on an ongoing request basis, with regular meetings on a monthly basis, or more frequently as needed.

• The chair shall report regularly to the GSPH Council and provide a summary of its activities at least annually at the school-wide faculty meeting.

• All actions can be circulated among the committee for a vote between regularly scheduled meetings.

• The committee may accomplish its charge through administrative action by the Associate Dean for Faculty Affairs. Specific tasks delegated to the Associate Dean for Faculty Affairs shall be reviewed at the first meeting of each academic year and approved by a simple majority. Examples of tasks commonly delegated to the Associate Dean for Faculty Affairs are:
  
  o Appointment as adjunct faculty;
  o Appointment as visiting professor;
  o Membership in the graduate faculty; and
  o Recommendation of honorary degrees or other University recognition.

E. FAPTC Role in Faculty Mentoring
The role of the FAPTC is that of a review committee. The appointment, promotion, or conferral of tenure proposal originates in the appropriate department and, after consultation with the senior faculty in that department, the packet is submitted by the department chair to the Dean’s office for the Associate Dean for Faculty Affairs who in turn submits it to the FAPTC for consideration. It is the role of the department’s senior faculty to advise and mentor the junior faculty member prior to submission of the packet to the FAPTC. The departmental representative to the FAPTC can participate in this process as a senior faculty member in the department, but not as a representative of the FAPTC. FAPTC members must abstain from voting on actions that originate in their department.

The FAPTC respects departmental autonomy to initiate such actions. The FAPTC, including its chair, shall play no role advising faculty in GSPH about the appropriateness or the strength of their case after it has been submitted to the FAPTC.

The Associate Dean for Faculty Affairs should facilitate the promotion/tenure process by disseminating clear guidelines about the structure and content of an appointment, promotion or tenure packet and sponsor workshops for interested faculty on the process. In an administrative capacity, the Associate Dean for Faculty Affairs may also consult with the department chairs or faculty members as requested.

IV. Policies

In considering actions of appointment, promotion and tenure within the Graduate School of Public Health, it is advisable to consider the diverse nature of public health activities and myriad disciplines that are represented by those participating in these activities and thus represented on faculties of schools of public health. In addition to faculty trained in the traditional scientific disciplines of public health (e.g., epidemiology, biostatistics and environmental health), there are faculty members trained in the humanities and social sciences. Review of such candidates from diverse disciplines must, therefore, take into account the academic norms, mores and professional opportunities and standards particular to those disciplines and fields of study. These diverse norms should be noted in the request letter sent to the external reviewers. It is important for those reviewing the external references and the candidate’s dossier to be aware of the relevant disciplinary norms for the candidate’s work. Guidelines for consideration of research/scholarly achievements and examples of objective evidence demonstrating research/scholarly achievement are described in the following sections for tenure and appointment stream appointments.

A. Faculty Appointment and Promotion (Tenured and Tenure Stream)

1. Tenure Stream Appointments
   Appointment to the positions of Assistant Professor or Associate Professor can be made in the tenure stream. Tenure-stream faculty are expected to undertake research, teaching, and service activities.

2. General Considerations for Appointment and Promotion with Tenure
   Research and teaching are necessary requisites for appointment or promotion to tenure. The balance between accomplishments in research (and other scholarly
activities) and teaching may vary considerably from one candidate to another, but both must be present before tenure is granted. Service activities by a faculty member should be weighted into any decision regarding tenure, but such activities in the absence of both teaching and scholarship are not an adequate basis for tenure.

A requirement for tenure is research scholarship. Research scholarship is the long-continued systematic study leading to competent mastery of one or more of the highly organized academic studies; more narrowly, it is advanced study which leads to the acquisition of the detailed knowledge in some special field, along with accuracy and skill in investigation and powers of critical analysis in interpretation of such knowledge. Candidates for tenure in the Graduate School of Public Health should have demonstrated significant accomplishment in scholarly endeavors, application and communication of knowledge using laboratory, clinical, and other research tools. Regardless of its form, the candidate's scholarship must provide compelling promise of continued creativity and independence.

A requirement for appointment or promotion with tenure is demonstrated skill in and dedication to teaching. The candidate should have demonstrated a capacity and a desire to maintain teaching effectiveness and show capacity for continuing growth as a teacher. Excellence in teaching includes being a model of professional conduct for students and colleagues. The quality and quantity of a candidate's teaching must be documented by the chair in their supporting letter.

Service and administrative contributions by a faculty member should be weighed into any decision regarding tenure. However, in order to qualify for tenure, the greater emphasis will be on research and teaching.

Appendix D of the Operating Manual lists guidelines and objective information to document that the individual has achieved the specified level of qualifications. These examples are not meant to be comprehensive, and any other information that documents the individual’s level of research, teaching, and service achievement will also be considered.

3. Appointment of Appointment Stream Faculty to Tenure Stream Positions
Appointment stream faculty may qualify for tenure by virtue of increased scholarly productivity and may be recommended for tenure through the usual academic process. Recommendations for appointment of appointment stream faculty to a tenured position must follow all of the school's regular policies and procedures for appointment and promotion, including creation of a position and establishment of a national search committee.

4. Tenure Stream Faculty: Temporary Transfer Outside of Tenure Stream
Transfers are described in the Faculty Handbook (http://www.provost.pitt.edu/handbook/handbook.html).

B. Faculty Appointment and Promotion (Appointment Stream)

1. Appointment Stream Appointments
Among the GSPH faculty there are persons who possess special skills contributing substantially to the mission of the University who are not hired to devote full-time effort to the University, or whose positions are funded for a finite period, or whose professional and academic preparations are not complete, or who are not expected to perform the same range of duties expected of a tenure-stream member of the faculty or to make the same contributions to the University community, and who are agreeable to a appointment stream appointment without implication of tenure. Policies relating to these faculty are described in the Faculty Handbook (http://www.provost.pitt.edu/handbook/handbook.html).

2. Title and Ranks
Under these or other exceptional circumstances, appointments and promotions outside the tenure stream and without tenure may be made at the ranks and with the title of professor, associate professor, assistant professor, and instructor. Appointments and promotions with prefixes to the above ranks are described in the Faculty Handbook (http://www.provost.pitt.edu/handbook/handbook.html).

Appendix D of the Operating Manual lists guidelines and objective information to document that the individual has achieved the specified level of qualifications. These examples are not meant to be comprehensive, and any other information that documents the individual’s level of research, teaching, and service achievement will also be considered.

C. Appointment and Promotion of Research Faculty

1. General Considerations
Appointment and promotion of Research faculty is in the appointment stream. Achievements to be considered when evaluating for appointment/promotion of the positions of Research Assistant Professor, Research Associate Professor and Research Professor are similar to those of Assistant Professor, Associate Professor and Professor except research faculty positions place an emphasis on research accomplishments. While less emphasis is placed on didactic teaching, professors in the research qualified track are likely to be engaged in teaching laboratory skills, serving on thesis committees, and acting as a role model to students.

Appendix D of the Operating Manual lists guidelines and objective information to document that the individual has achieved the specified level of qualifications. These examples are not meant to be comprehensive, and any other information that documents the individual’s level of research, teaching, and service achievement will also be considered.

2. Options for Appointment Outside of the Research Track
Individuals with an appointment as a Research Assistant Professor, Research Associate Professor or Research Professor may be appointed to a position as an Assistant Professor, Associate Professor or Professor by virtue of scholarly productivity sufficient to merit such appointments through the usual academic process as defined below. Note that teaching is one of the key aspects of productivity that is required for such an appointment. As teaching is not
emphasized for appointment/promotion in the Research track, an individual in the Research track who wishes to obtain such an appointment should seek to participate in graduate level teaching and serve as a mentor to students to demonstrate their accomplishments as a teacher as well as those in the areas of research and service.

a. Appointment to a Tenure Stream Position
Recommendations for appointment of Research track faculty to a tenure stream position as Assistant Professor, Associate Professor or Professor shall follow all of the school's regular policies and procedures for such appointments as defined in Section IV.A of this document. This includes the creation of a position, establishment of a search committee, and letters of recommendation from external reviewers.

b. Appointment to an Appointment Stream Position
Recommendations for appointment of research track faculty to an appointment stream position as Assistant Professor, Associate Professor or Professor shall follow all of the school's regular policies and procedures for appointment as defined in Section IV.B of this document, including the establishment of a search committee and letters of recommendation from external reviewers.

D. Appointment and Promotion of Public Health Practice Faculty

1. General Considerations
Public Health Practice faculty are appointed for expertise derived from professional practice in public health, in contrast with expertise derived from academic research or teaching. To be accredited as a Graduate School of Public Health by the Council on Education for Public Health (CEPH), a Graduate School of Public Health must meet several criteria defined by CEPH. One criterion has been interpreted by CEPH to require a component of faculty that includes individuals with competence in public health practice and that these faculty have links to organizations, agencies and professionals responsible for public health policy and practice. This criterion is identified by CEPH as follows:

\[ The\ school\ shall\ have\ a\ clearly\ defined\ faculty\ which,\ by\ virtue\ of\ its\ size,\ multidisciplinary\ nature,\ educational\ preparation,\ research\ and\ teaching\ competence,\ and\ practice\ experience\ is\ able\ to\ fully\ support\ the\ school’s\ mission,\ goals\ and\ objectives. \]

The school’s document that defines the criteria for appointment and promotion of Public Health Practice faculty entitled, Graduate School of Public Health: Criteria for Appointment and Promotion, Public Health Practice Faculty (February 14, 2001) is found in Appendix B.

The activity and accomplishments expected of Public Health Practice faculty have a different focus from that of non-practice faculty. Public Health Practice usually involves helping health agencies or communities to assess public health problems, to plan, implement or evaluate public health programs or to develop public health
policies. As such, there is often a service component to practice involving long-term involvement to help define and/or solve immediate public health problems. A Public Health Practice faculty member works to help solve some public health problem with an international, national, state or local health/health care agency.

There can be a research component to practice. Practice-oriented research is usually defined by the agencies or communities involved and deals with immediate problems. The practice faculty is a collaborator with the agencies/communities and the research is jointly owned. As such, the role of the faculty member is often one of co-investigator with health agencies and communities rather than that of the more traditional role of “principal investigator.”

The scholarly product of practice is often in the form of technical reports, presentations to professional meetings and/or “program” type publications in the more traditional research journals as well as peer-reviewed publications in scholarly journals.

Teaching public health students may take place in applied research and supervised field experiences as well as in the classroom.

Appendix D of the Operating Manual lists guidelines and objective information to document that the individual has achieved the specified level of qualifications. These examples are not meant to be comprehensive, and any other information that documents the individual’s level of research, teaching, and service achievement will also be considered.

2. Alternative Options Regarding Tenure and Appointment Stream Appointments
Such appointments may support the goals of the school when the change occurs within the legitimate framework of special achievement or of a clearly defined modification of professional emphasis and goals. Recommendations for appointment to a non-practice faculty rank shall follow all of the school’s regular policies and procedures for appointment and promotion, including creation of a position and establishment of a search committee.

3. Award of Tenure
Public Health Practice faculty members are generally appointed in the appointment stream. However, in exceptional circumstances they may be nominated for award of tenure while remaining in the Public Health Practice Track. (See Appendix B).

E. Appointment and Promotion of Public Health Education Faculty (appointment stream)

1. General Considerations
The objective of the educator concentration is to encourage and promote individuals whose primary professional activity is teaching and education. The primary mission of such faculty is to disseminate relevant knowledge and skills to public health students and professionals, as well as the general public. Scholarly acquisition and communication of data pertaining to teaching methods and outcomes is not required but is encouraged. All GSPH faculty, including those in the educator concentration,
are expected to participate at some level in the research and service activities of the school.

This concentration is intended for individuals who plan to make education in public health their primary focus. As such, the criteria for promotion in the public health education concentration are distinct from other tracks (i.e., research and public health practice). Sufficient achievement relevant to these criteria must be demonstrated for successful promotion. The candidate’s departmental chair should specifically address the assignment of this concentration when writing statements of support for appointment and/or promotion.

In general, applicants are expected to have an earned doctorate or appropriate professional degree in a field that is relevant to the department in which they are being appointed. The candidate’s dossier submitted at the time of appointment or promotion should contain the same materials as described for other GSPH faculty appointments or promotions (FAPTC operating manual) and be consistent with the Provost’s Guidelines on the Preparation of Dossiers (http://www.provost.pitt.edu/memo/faculty_personnel_actions.html). In addition, a teaching portfolio is expected to be part of the promotion package. For example, some items that are appropriate for a teaching package include but are not limited to: (1) motivation and impact of courses that were developed (if the course was a major revision of a previous course then details need to be provided in regard to the changes that were made and the rationale.), (2) letters from former students in regard to the impact the faculty member's teaching, mentorship or program had on their careers, (3) description, motivation and measure of impact of new tracks or programs, (4) examples of educational materials authored by the faculty member, and (5) statement of teaching philosophy.

Outside letters of support should be obtained from individuals who are considered educators in public health. When the FAPTC solicits letters from selected referees, requests will clearly indicate that the candidate is in the educator concentration and outline the general functions and goals of this position as well as criteria for promotion. Outside letters obtained for promotion should acknowledge that the individual is in the educator concentration and evaluate the candidate’s credentials in light of these goals and criteria.

Appendix D of the Operating Manual lists guidelines and objective information to document that the individual has achieved the specified level of qualifications. These examples are not meant to be comprehensive, and any other information that documents the individual’s level of research, teaching, and service achievement will also be considered.

F. Search Committee Policy

Search committees are required for all primary appointments in all tracks and concentrations. It is essential that search committees cast a wide net during the search process and give all qualified candidates full consideration for the position. Opening
these job opportunities to a broad set of candidates enhances diversity in the departments and the school.

Requirements concerning the composition of search committees include:

- Committees must have a minimum of five members with the majority at or above the rank of proposed position.
- Multiple genders must be represented on the committee.
- Department Chairs may not chair search committees for positions within their own department.
- At least one member of the search committee is a faculty member outside of the Graduate School of Public Health.
- An emeritus faculty member may serve on a search committee, but they do not count toward the membership required for a faculty search.

The role of the FAPTC member is to assure the consistency of the search in complying with both University and Pitt Public Health guidelines.

Before the commencement of a search, the chair of the department and the chair of the search committee should review resources such as the Association of American Colleges and Universities’ publication entitled, Diversifying the Faculty: A Guidebook for Search Committees, available from the Dean’s Office. Additionally, the chair of the department shall meet with a member of the Faculty Diversity Committee on an annual basis to discuss recruitment strategies based on the Pitt Public Health goals regarding faculty diversity.

Each search must be advertised in publications or on websites devoted to increasing diversity in academia. The Department Chair should review the advertisement before it is distributed to ensure that it will attract an appropriately broad range of diverse applicants. Each department should create and maintain a list of publications where advertisements for faculty positions in the department should be placed. In case of poor response to the initial job posting, additional job posting with longer timelines should be considered to attract qualified applicants.

The expectation is that multiple qualified candidates will be identified from an inclusive search and it is recommended that at least three candidates be interviewed. In-person or electronic interviews can be conducted in the first tier selection process. Final interviews must be conducted on site. Following the conclusion of the search, the details of the search process should be described in the search committee chair’s letter to the department chair.

After the search is completed, the Associate Dean of Faculty Affairs will review the results for compliance to stated policies and procedures. Appendix B details the duties and roles of each search committee member.
G. Joint Appointments
See Faculty Handbook (http://www.provost.pitt.edu/handbook/handbook.html).

H. Part-Time Faculty
The part-time faculty who serve on a half-time basis at a minimum are eligible for tenure or tenure-stream appointments at the same ranks and under the same criteria as full-time faculty. Such appointments are rare at the outset and must be approved by the Provost if this status is assumed by a previously full-time tenured or tenure stream faculty member. See Faculty Handbook (http://www.provost.pitt.edu/handbook/handbook.html).

I. Appointments to the Graduate Faculty
Graduate faculty status is for faculty to direct doctoral dissertations. Each faculty must document experience in research, teaching of graduate level courses, supervision of graduate research, scholarly publications. For more detailed information. See Faculty Handbook (http://www.provost.pitt.edu/handbook/handbook.html).

J. Faculty Grievances and Appeals Related to Appointment, Promotion and Tenure
See Faculty Handbook (http://www.provost.pitt.edu/handbook/handbook.html).

V. PROCEDURES

A. Operating Procedures of the Faculty Appointment, Promotion and Tenure Committee are detailed at:
http://www.publichealth.pitt.edu/faptc

- The Associate Dean for Faculty Affairs shall act as vice chair and will serve as chair in the absence of the chair. There will be no faculty substitutes at meetings. Three consecutive non-excused absences at regularly scheduled meetings will necessitate removal from the committee and the appointment of a replacement, at the discretion of the Associate Dean for Faculty Affairs. Requests for excused absences must be made in writing to the Associate Dean. The meetings of the committee will be held monthly during the academic year. Additional meetings may be called as necessary.
- Appropriate material shall be distributed by the office of the Associate Dean for Faculty Affairs the week prior to the meeting. The chairman reserves the right to present new material at the meeting, but every effort will be made to avoid this.
- Relationship to the other GSPH committees: the FAPTC reports to the GSPH Council on all recommended actions.
- No formal committee minutes shall be prepared. A record of actions taken shall be kept and the Dean shall be notified of these actions.
- The committee shall submit an annual report to the Dean and GSPH Council on the general status of appointments, promotion and tenure at GSPH as well as any relevant trends developing in academia.
- The office of the Associate Dean for Faculty Affairs shall provide all necessary direct staff assistance to the committee.
• The Associate Dean for Faculty Affairs will recommend for the FAPTC to review proposed amendments to the FAPTC Operating Manual. FAPTC will, in turn, recommend any desired amendments to the GSPH Council.

B. Appointments: Review Process

• The Associate Dean for Faculty Affairs reviews all appointment packets for completeness. (Only the Associate Dean may contact the Department Chair for additional information, if necessary).
• The Associate Dean for Faculty Affairs will assign the packet to two primary reviewers.
• The primary reviewers will draft an evaluation letter to the Dean with recommended action and, after drafting it, they will lead the FAPTC’s discussion of the candidate and the letter.
• The Associate Dean will meet with the Department Chair, as needed.
• All eligible FAPTC members will vote on the recommended action and sign the concurrence sheet.
• A minority report will be drafted if the vote on the action is not unanimous.
• The FAPTC chair will present the appointment packet to GSPH Council for vote on concurrence.

C. Promotions

1. GSPH Dossier

   The dossier for promotion must be consistent with the Provost's Guidelines on the Preparation of Dossiers (see appendix C or [http://www.provost.pitt.edu/memo/faculty_personnel_actions.html](http://www.provost.pitt.edu/memo/faculty_personnel_actions.html)) and should contain the following:
   • Cover letter from the department chair to the Dean.
   • Recommendation actions and signed secret ballots from department faculty who are at equivalent or higher rank to the candidate.
   • Most recent three (3) years of annual faculty evaluations.
   • Narrative statement prepared by candidate (4-5 pages suggested).
   • *Curriculum vitae* in GSPH format.
   • List all grants received. Grants from the past 5 years should include granting agency, title of grant, period of the grant, total direct cost and the role of the candidate in the grant.
   • List all courses taught during the last 5 years with enrollment; include invited lectures and documents related to the candidate’s teaching (teaching evaluations for the past 5 years).
   • Names, titles, and current addresses of six (6) recommended referees external to the University of Pittsburgh; each from different academic institutions. These references should not have collaborated with the candidate at any point over the preceding three years. This list should be prepared by the Department Chair in consultation with the candidate; there should be a notation as to who proposed each referee.
   • Copies of five (5) publications (published, in press, or accepted).
• Optional: Candidate may submit supporting letters from colleagues, faculty and students at the University of Pittsburgh related to their research, service, teaching and mentoring.

For appointments and promotions to Associate Professor and to Professor with tenure, as well as conferral of tenure actions, the types of materials to be provided to the Provost's Office are described in Provost Maher’s memo from January 14, 1998 (http://www.provost.pitt.edu/memo/faculty_personnel_actions.html). See also appendix C.

2. Review of GSPH Dossier for Promotion and/or Tenure
   The promotion process begins within the department of the faculty member. The department chair discusses the promotion process with the faculty member. If the Chair supports the promotion, eligible primary faculty (those holding rank and tenure equivalent or greater to the candidate’s proposed rank and tenure) vote on the proposed action. If the departmental vote is a majority in favor of the promotion, the candidate for promotion then prepares a full dossier for submission to the Dean’s office.

   The GSPH review begins once the candidate’s dossier is forwarded to the FAPTC from the Associate Dean for Faculty Affairs. Two members of the committee with rank at or above that proposed for the candidate and not from the candidate’s department are assigned as primary members to direct the review. The primary tasks of the two lead members are to perform preliminary review of the dossier for completeness, identify a list of possible external reviewers for letters of recommendation, and notify the Associate Dean for Faculty Affairs of the list of reviewers. The two lead members may solicit advice from other FAPTC members. The Associate Dean for Faculty Affairs solicits all letters of recommendation.

   Once the letters of recommendation are received, the two lead members conduct a thorough evaluation of the promotion documents. Together the two members discuss the case, and then generate an initial working draft letter to the Dean for consideration of the faculty member’s promotion. The intent of the letter is to summarize the candidate’s qualifications and accomplishments, the external reviewers’ comments, and conclude with the FAPTC’s evaluation and recommendation regarding promotion.

   The full committee review takes place following the completion of the draft letter. Under the guidance of the two lead members, the full committee reviews the candidate’s dossier, reviews and finalizes the committee’s letter of recommendation and votes to approve the letter and to send the recommendation for faculty action to the GSPH Council.

   The chair of the FAPTC presents the committee’s recommendation to the GSPH Council during a closed session during which only eligible voting members of the council who are faculty are present. These members vote on the FAPTC recommendation. The work of the FAPTC is completed following the GSPH Council vote.
When the GSPH Council vote is obtained, the reviewed packet is forwarded to the Dean’s office by the Associate Dean for Faculty Affairs. The packet includes the external reviewers’ letters, the FAPTC letter, the candidate’s original dossier, and the documentation of the GSPH Council vote.

D. Timetable for Appointments and Promotions
   See *Faculty Handbook* ([http://www.provost.pitt.edu/handbook/handbook.html](http://www.provost.pitt.edu/handbook/handbook.html)).

E. Checklists
   The following checklists should be used for submitting documents for FAPTC actions. They comprise the cover sheet for the corresponding documents. Checklists are found in Appendix A as well as the GSPH Intranet under the Faculty and Staff page.

   A-1. Primary Faculty Position Search Committee
   A-2. Appointment of Primary Faculty
   A-3. Preparation of Faculty Promotion Dossier
   A-4. Secondary Faculty Appointment
   A-5. Adjunct Faculty Appointment
   A-6. Graduate Faculty Nomination
   A-7. Visiting Faculty Appointment
Primary Faculty Position Search Committee Checklist

Submit this checklist as the cover sheet for proposed faculty action. Submit one electronic copy and one paper original of all items to the Director of Personnel.

1. Letter from Department Chair justifying creation or replacement of a faculty position.

2. Position Description

3. Position Advertisement
   The position advertisement must include the following information:
   - Rank and/or title. State if “open” or “negotiable.”
   - Tenure status – tenured, tenure-stream, appointment stream, or combination.
   - Employment category of the position – full-time or part-time.
   - A brief statement of duties.
   - Minimum objective qualifications (i.e., degrees and experience); other desirable qualifications
   - Salary range for the position or a minimum salary.
   - Proposed position start date.
   - Closing date for receipt of applications (or the statement, “In order to ensure full consideration, applications must be received by [date]”). State if “open.”
   - The name, address, telephone number and/or email of the person to contact.
   - Minimally, the tag line, EEO/AA/M/F/Vets/Disabled, must appear at the end of every advertisement and replaces previous affirmative action statements.

4. Affirmative Action Pre-Audit Form: *
   - Committees must have a minimum of five members with the majority at or above the rank of proposed position.
   - Committees must represent each gender.
   - Department Chairs may not chair search committee for positions within their own department.
   - At least one member of the search committee is an active member of the FAPTC (they must be outside of the department initiating the search).
   - At least one member of the search committee has attended the Faculty Diversity Workshop presented by the Health Sciences Diversity Office entitled, Workshop for Increasing Faculty Diversity.
   - At least one member of the search committee is a faculty member outside of the Graduate School of Public Health.
   - An Emeritus faculty member may serve on a search committee, but they do not count toward the membership required for a faculty search.
   - Part II. C. of the Affirmative Action Pre-Audit Form is completed.

5. Funding Data Supplement Form *

Updated 16.MAY.2017
Primary Faculty Appointment Checklist

Submit this checklist as the cover sheet for proposed appointment.
Submit one electronic copy and one paper original of all items to the Director of Personnel.

1. Letter from Department Chair to Dean.

2. “Standard Offer Letter” signed by the selected candidate, the Department Chair, and Dean (Tenured/Tenure Stream appointment letters must also be signed by the Senior Vice Chancellor for Health Sciences).

3. Letter from the Search Committee Chair to the Department Chair detailing the selection process.

5. Completed Funding Data Supplement Form.

7. Application letter from the candidate.

8. Candidate’s current Curriculum Vitae.

9. Degree verification – Transcripts for graduate degree/s. If appointment is at Assistant Professor level or lower, and the candidate has not yet completed the degree, then provide an official letter from the degree-granting institution which indicates the expected date of degree completion, which must precede the appointment date. Official transcripts must be submitted upon degree completion.

10. Letters of reference from referees* external to the University of Pittsburgh or UPMC:
*Academic references must be from individuals of equal or higher rank than the proposed appointment. Non-academic referees must have substantial experience and appropriate qualifications. Do not include close collaborators or former graduate students.
- Assistant Professor rank or lower - must provide three or more letters.
- Associate Professor or Professor ranks - must provide six or more letters of which at least three of the letters must be from referees identified by the search committee or FAPTC and independent of the candidate.

11. Publications:
- Two or more selected publications – Assistant Professor rank
- Three or more selected publications – Associate Professor or Professor rank

Publication requirements for individuals seeking to identify with Public Health Practice (PHP) or Public Health Education (PHE) are as follows -
- Public Health Practice only: see PHP section of FAPTC Operating Manual† for other acceptable materials, e.g., technical reports and presentations to professional meetings.
- Public Health Education only: see PHE section of FAPTC Operating Manual† for other acceptable materials, e.g., textbook chapters, publications related to public health education, publication of important teaching materials.

12. Additional Materials:
For individuals seeking to identify with Public Health Practice (PHP) or Public Health Education (PHE), the following items should be included -
- When applicable, a letter from immediate supervisor supporting the appointment, e.g., Director of the Health Department for ACHD, etc. This is especially important if the proposed role requires release time from employer to complete duties associated with the appointment.
- When appropriate, other letters that document qualifications may be sought, e.g. when an appointment is proposed that is based on experience in public health agencies rather than scholarship or academic positions.

Checklist B Updated 16.MAY.2017
# Pitt Public Health
## Primary Faculty Promotion Checklist

*Submit this checklist as the cover sheet for proposed promotion.*

*Submit one electronic copy and one paper original of all items to the Director of Personnel.*

1. Letter from the Department Chair to the Dean.
2. Department faculty members’ recommendations and signed ballots.
   - Ballots must be from primary faculty members of equal or higher rank to the rank of the proposed promotion.
3. Annual Faculty Evaluations for the past three years.
4. Self-evaluation narrative statement (4-5 pages).‡
   - Public Health Education faculty must include a teaching philosophy in the statement.
5. Curriculum Vitae:‡
   - CV should follow the Pitt Public Health format and include -
     - Papers published, accepted for publication, or in press. (Do not include articles submitted or in preparation.)
     - Grant Information
       - Name of the granting agency
       - Title of the grant
       - Dates of the grant
       - Candidate’s role in the grant (PI, Co-Investigator, etc. using NIH definitions)
       - Total Direct Cost of grant (if PI) or the subaward of your portion (if Co-Investigator)
     - Lists of all courses/lectures taught
       - This information should include the course title(s), the role of the candidate in the course(s), and course enrollment.
6. Teaching Portfolio:‡
   - Course Teaching Information -
     - Candidate’s role (guest lecturer, course coordinator, etc.)
     - # of lectures given if guest lecturer
     - Copy of course syllabus
     - OMET student teaching evaluations for candidate’s lectures/courses from the date of last promotion or date of appointment.
   - Student/Trainee Advising and Mentoring -
     - Student name
     - List of student publication(s)
     - Year degree earned

Teaching Portfolio requirements for individuals seeking to identify with Public Health Practice (PHP) or Public Health Education (PHE) may be found in Appendix D of the FAPTC Operating Manual†. Examples are based on tenure status and may include the following -

- **Public Health Practice only**: demonstrated ability to teach, evaluate and mentor graduate students; service as committee member of students’ theses, dissertation committees and examination committees; contributions to the design, organization and instruction of course or educational programs; and/or evidence of maintained teaching effectiveness and continued growth.
- **Public Health Education only**: demonstrated ability to teach, evaluate and mentor graduate students; service as committee member of students’ theses, dissertation committees and examination committees; recognition by peers nationally and/or internationally; membership in organizations involved with public health education policy; demonstrated excellence in classroom teaching; substantial leadership and/or extra-classroom achievements in education; publication of textbook chapters; and/or successful recruitment of qualified trainees to the departmental programs.
7. List of six referees* external to the University of Pittsburgh/UPMC, developed in consultation with the Department Chair:
   * Academic Referees must be of equal or higher rank of the proposed promotion. Non-academic referees must have substantial experience and appropriate qualifications for peer review. Do not include close collaborators or former graduate students. Do not include reference letters.
   • Include name, full title, and contact information. Be sure to notify each referee that (s)he will be contacted by our office.

8. Publications: ‡
   • Five publications that are published, accepted or in press -
     o Public Health Practice only: see PHP section of FAPTC Operating Manual and Appendix D for other acceptable materials, e.g., technical reports and presentations to professional meetings.
     o Public Health Education only: see PHE section of FAPTC Operating Manual and Appendix D for other acceptable materials, e.g., textbook chapters, publications related to public health education, publication of important teaching materials.

Pitt Public Health
Secondary/Joint Faculty Appointment Checklist

Submit this checklist as the cover sheet for proposed appointment.
Submit one electronic copy and one paper original of all items to the Director of Personnel.

1. Letter from the Pitt Public Health Department Chair to the Dean, requesting the proposed secondary appointment with a summary of the candidate’s qualifications. Include the following:
   - Candidate’s role and expected responsibilities in the Pitt Public Health department.
   - Address monetary and/or resource agreements.

2. Letter from Department Chair of candidate’s primary appointment indicating concurrence with secondary appointment.

3. Candidate’s current Curriculum Vitae.

Adjunct Faculty Appointment Checklist

Submit this checklist as the cover sheet for proposed appointment.
Submit one electronic copy and one paper original of all items to the Director of Personnel.

1. Letter from Pitt Public Health Department Chair to the Dean which:
   • Summarizes the qualifications of the proposed candidate.
   • Defines the role the candidate will have in the department and school, relative to teaching/mentoring, research collaboration, or enhancing GSPH connections for community service, etc.
   • Addresses monetary agreements.

2. Candidate’s current Curriculum Vitae:
   • If applicable, a brief narrative describing the role and responsibilities of positions held including titles, agencies, dates, as well as other information related to academic qualifications.

3. Additional Information:
   • If applicable, a letter from immediate supervisor supporting the adjunct appointment. This is especially important if the proposed role requires release time from employer, such as teaching during daytime, etc.
   • When indicated, other letters that document qualifications, e.g., when the proposed appointment is based on experience in the public health sector rather than on scholarship or academic position(s).

Checklist G  
Updated 16.MAY.2017
Pitt Public Health
Visiting Faculty Appointment Checklist

Submit this checklist as the cover sheet for proposed appointment.
Submit one electronic copy and one paper original of all items to the Director of Personnel.

Visiting Faculty are those faculty hires who will not remain employed in Pitt Public Health for more than one year; the appointment is temporary (see, “Article VI. Full- and Part-Time Appointment Stream Faculty” in the University of Pittsburgh Faculty Handbook). These temporary hires are visiting the University, and are going to another institution at the conclusion of the one-year appointment.

1. Letter from Department Chair to Dean requesting the proposed visiting appointment to include:
   - A summary of the candidate’s qualifications.
   - Candidate’s experience in research and teaching.
   - Candidate’s anticipated roles and responsibilities in the department.
   - Length of the appointment

2. Candidate’s current Curriculum Vitae.

           Associate Dean for Faculty Affairs
GRADUATE SCHOOL OF PUBLIC HEALTH

Criteria for Appointment and Promotion
Public Health Practice Faculty

To be accredited as a graduate school of public health by the Council on Education for Public Health (CEPH), GSPH must meet the following criterion, among others:

VIII.A. The school shall have a clearly defined faculty which, by virtue of its size, multidisciplinary nature, educational preparation, research and teaching competence, and practice experience (boldface added), is able to fully support the school's mission, goals, and objectives.

CEPH also interprets this criterion to include faculty with competence in public health practice and practice links.

This document, adapted in part from Developing a Clinical Appointment Track in a School of Public Health: a Guide and reflecting current national developments toward a public health practice category, presents the criteria for appointment and promotion of GSPH faculty with public health practice experience.

The Graduate School of Public Health uses the terms "practice" or "clinical" for faculty appointed in a Public Health Practice Category. Appointment and promotion may be made at the levels of Instructor, Assistant Professor, Associate Professor, or Professor in any of the School's program areas.

The purpose of the public health practice category is to enhance the School's capacity for achieving the goals embodied in its mission. This category provides a means for the School to expand links between the Graduate School of Public Health and external public health professionals, organizations, agencies and institutions. The public health practice category is

---

2University Policy 02-02-01.

3AThe mission of the Graduate School of Public Health (GSPH) is to promote health and prevent disease in individuals and their communities by anticipating and responding to public health needs through research, teaching, and service and to enhance current public health initiatives through interaction and collaboration with other health care disciplines and organizations.
especially intended as a mechanism for involving external public health practitioners in the educational, research and service missions of the School.

A. PUBLIC HEALTH PRACTICE: DEFINITION CRITERIA

For the purposes of appointment, promotion, and tenure, public health practice is defined by the following criteria.

As presently construed, for the purposes of promotion and tenure, public health practice has the following connotations:

1. A faculty member works to help solve some current public health problem with a national, state, or local health agency, directly with a community, or in another setting, e.g., international, health care, or worksite agencies.

2. Often the role of the faculty member is one of collaboration with health agencies and communities rather than that of the more traditional role of "principal investigator."

3. The results of the work are directly and immediately applicable, as compared to the more "distant" application of research findings.

4. Practice usually involves helping health agencies or communities to assess public health problems, to plan, implement or evaluate public health programs, or to develop public health policies.

5. Practice often involves the faculty member in direct contact with communities or populations that are the clients, recipients, or beneficiaries of public health programs or services.

6. The program planning, implementing, and evaluating process is often long-term and time intensive.

7. The "scholarly" product of practice is often in the form of technical reports, presentations to professional meetings, and/or "program" type publications in the more traditional research journals.

8. Practice often has an advocacy component.

---

9. A faculty member's practice experiences and the teaching of public health students is linked, and such a linkage may be in the classroom or it may be in supervised field experiences in which graduate students work with or under the supervision of the practice faculty member.

10. There can be a research component to practice. Practice-oriented research is defined by communities/agencies and deals with immediate problems. The practitioner/researcher collaborates with communities/agencies, and the research is jointly owned.

11. There can be a service component to practice. Practice-oriented community service is community and/or health agency based, is long-term, and helps communities and/or agencies define and/or solve immediate public health problems.

B. SEARCH AND APPOINTMENT REQUIREMENTS

1. Proposed public health faculty appointments will follow the usual GSPH guidelines, and it is expected that the principles of affirmative action and GSPH's commitment to enriching the diversity of its faculty will be followed as well.

2. Public health practice faculty are expected to demonstrate outstanding achievement as public health professionals in the service arena and contribute to the educational and research programs of the Graduate School of Public Health.

While scholarly or practical contributions are anticipated for all faculty and expected at more senior clinical or practice ranks, independent, sustained funded research need not be among the criteria.

3. Proposed appointment or promotion of public health practice faculty will be submitted to the FAPTC for review and recommended action.
B. MODIFYING CRITERIA FOR APPOINTMENT AND PROMOTION OF PUBLIC HEALTH PRACTICE FACULTY

1. All faculty titles in the Public Health Practice Category will be followed by the suffix "of Public Health Practice":
   a. Instructor of Public Health Practice
   b. Assistant Professor of Public Health Practice
   c. Associate Professor of Public Health Practice
   d. Professor of Public Health Practice

2. The following modifiers are to be used for faculty titles as appropriate.
   a. Adjunct (prefix)\(^5\)
   b. Clinical (prefix or suffix)\(^6\)

\(^5\)According to University Policy 02-02-06 'II, the Adjunct\(^\) prefix is defined (Also adopted by the GSPH Policy and Procedure Manual: Part Three (October 17, 1994)):

Adjunct: One whose primary employment is outside an academic unit of the University, but who is fully qualified professionally and who performs on a part-time basis, duties which would otherwise be assigned to members of the full-time faculty.

\(^6\)According to University Policy 02-02-06 'II, the Clinical\(^\) prefix is defined (Also adopted by the GSPH Policy and Procedure Manual: Part Three (October 17, 1994)):

Clinical: One whose major contribution is as a preceptor of students and trainees in clinical skills, whether within the University or in another setting.
3. The following are criteria for the appointment and promotion of public health practice faculty.\(^7\)

a. Instructor: Faculty at this rank should have an earned doctorate or the highest appropriate professional degree considered to be the terminal degree in their area of specialization or provide evidence that they are successfully pursuing such a degree and expects to receive it within a reasonable amount of time, as well as recognized public health experience and a demonstrated commitment to teaching and excellence in public health service.\(^8\)

\(^7\)In rare instances, the requirement of a doctorate may be satisfied through accomplishments that can be considered a reasonable substitute for formal study. @ University of Pittsburgh Policy 02-02-04 ' II.

In implementing the criteria for the appointment and promotion of Public Health Practice Faculty, the FAPTC will follow the guidelines in the following two sources from the American Association for Higher Education:

\(^8\)According to University Policy 02-02-04 ' II (Also adopted by the GSPH Policy and Procedure Manual: Part Three (October 17, 1994)):

The instructor should have a doctor’s degree or the highest appropriate professional degree, or provide evidence that they are successfully pursuing such a degree and expects to receive it within reasonable time.

In some technical fields, professional experience may bear considerable weight; in other areas, teaching experience is essential.

Reappointment depends upon satisfactory scholarly progress and a demonstrated interest in and ability to pursue an academic career.
b. Assistant Professor: Faculty at this rank should meet all requirements of faculty at the previous rank and, in addition, should have an earned doctorate or the highest professional degree considered to be the terminal degree appropriate to their area of specialization and substantial recognized public health practice experience, as well as demonstrate a commitment to teaching and excellence in public health service.9

c. Associate Professor: Faculty at this rank should meet all requirements of faculty at the previous rank and, in addition, should have demonstrated evidence of competence in teaching, excellence in professional service and should have some scholarly activity underway. Faculty at this rank should show promise of becoming leaders in their fields and should have attained recognition at the state and/or national level.10

9According to University Policy 02-02-04 ' II (Also adopted by the GSPH Policy and Procedure Manual: Part Three (October 17, 1994)):

An assistant professor should evidence demonstrated teaching ability, substantial experience in advanced study and research, or professional experience of a kind that would enable them to make a comparable academic contribution.

The assistant professor should possess a doctorate or appropriate professional degree.

They should exhibit promise of originality and excellence in some field connected with teaching, writing, research, or the creative arts, and should have demonstrated ability in guiding and counseling students.

To be appointed or promoted to an assistant professorship, a person should have the potential for promotion to associate professor.

10According to University Policy 02-02-04 ' II (Also adopted by the GSPH Policy and Procedure Manual: Part Three (October 17, 1994)):

An associate professor should possess a doctorate or appropriate professional degree, and have substantial experience in teaching and research or applicable professional experience.

The person should show a capacity and will to maintain teaching effectiveness and the ability for continuing growth as a teacher, scholar, and member of their profession.

They should also have progressed in attaining eminence in a scholarly or professional field.

An associate professor must display consistently mature performance in course and curriculum planning, in guiding and counseling students and younger staff members, and in participating in the activities of the University.
d. Professor: Faculty at this rank meet all requirements of faculty at the previous rank and, in addition, should have demonstrated significant expertise in their teaching, outstanding achievement in their service roles, and should be engaged in scholarly activity, as documented by appropriate publications. Faculty at this rank should be leaders in their field and should have attained national and/or international peer recognition.\(^{11}\)

C. Public Health Practice Faculty appointments may be made for up to three years and may be renewed. All renewals will be submitted to the FAPTC for review and recommended action.

D. Although it should be a rare event, when appropriate, a faculty member may transfer from the Public Health Practice category to a non-practice faculty rank. Such transfers may support the goals of the School when the change occurs within the legitimate framework of special achievement or of a clearly defined modification of professional emphasis and goals.

Recommendations for transfer to a non-practice faculty rank shall follow all of the School's regular policies and procedures for appointment and promotion, including creation of a position and establishment of a search committee.

\(^{11}\)According to University Policy 02-02-04 'II (Also adopted by the GSPH Policy and Procedure Manual: Part Three (October 17, 1994)):

The rank of Professor recognizes the attainment of authoritative knowledge and reputation in a recognized field of learning and the achievement of effective teaching skill.

The professor should have attained superior stature in their field through research, writing, professional practice, or leadership in professional and learned organizations, as well as having exceeded the standards described for ranks shown above.
APPENDIX C
Source: January 14, 1998 Provost Maher memo
http://www.pitt.edu/~provost/personnel.html

IV. PREPARATION OF DOSSIERS
For appointments and promotions to Associate Professor and to full Professor with tenure, as well as conferral of tenure actions, the following types of materials should be provided to the Provost's Office.

A. Cover Letter. The cover letter should not simply be an indication of concurrence. Rather, the Dean or Regional Campus President should submit a detailed cover letter summarizing his or her independent opinion on the entire case. The cover letter should provide a full account of the specific scholarly, professional or creative contributions made by the candidate, and the role of the candidate within the context of the units' planning priorities. The letter should provide a balanced explanation of the candidate's scholarly contributions to the field and the impact made on the profession. In addition to providing an interpretation of the letters from external referees, the cover letter should indicate the other types of evidence used to inform your recommendation. The cover letter should present clearly the extent to which the recommendation was supported by the appropriate body of voting faculty in the unit and by voting members of all relevant committees. Actual votes should be noted. Reasons for abstentions at any level should be explained. If there is a minority opinion, the cover letter should address the reasons for the dissent. A representative for the dissenting views might be invited to submit a minority report. The dossier should also include the detailed letters written by the department or program chair, division chair, Regional Campus Vice President for Academic Affairs, and the chair of second-level promotion committees as appropriate. We now have several years of experience with our mandate for peer and student evaluations of teaching. All faculty members should be made aware of the teaching evaluation policies operative within their academic units. All recommendations submitted to the Provost's Office must contain summaries of the results of student and peer evaluations of teaching. A wide array of data exist for evaluating teaching, and the quality of a candidate's teaching should be described not only in terms of classroom performances but also include assessments of factors such as advising undergraduate and graduate students, supervising dissertations and theses, other types of interaction with students, formal student evaluations, the development of curricular materials, syllabi, and the faculty member’s evaluations of students' work. As necessary, one should consult with the Office of Measurement and Evaluation of Teaching regarding the preparation of teaching dossiers. The cover letter should present a summary of the candidate's University service. Within the dossier, other letters should present the candidate's service in more detail, including the nature and quality of the service, and the importance of the service to the discipline or profession, the home academic unit, and, as appropriate, the University.

B. Curriculum Vitae. The curriculum vitae should provide the essential professional history of the candidate, listing all elements of formal post-secondary education and all professional positions held. Publications should be categorized into separate groupings, such as books, abstracts, monographs, journal articles, chapters in edited volumes, and textbooks. Names of co-authors should always be included in the order in which they appear on the publication. It is important to list the page numbers for each published item or, in the case of a book, the total
number of pages. There should be an indication as to which journal articles are refereed. Conference presentations, if reported, should be listed in a separate category. Through the faculty mentoring processes of your units, faculty members should be made aware of the appropriate curriculum vitae content for the purposes of your unit and the Provost's Office. All courses taught in the past five years should be listed, with the enrollment for each course, as well as all master's theses and doctoral dissertations supervised. Mention should be made of the present professional status of those master's or Ph.D. graduates, and the publication of a thesis or dissertation. Research grants should be listed, for at least the last five years. For each grant or contract, the granting agency, the title of the award, the period, and the amount designated as total or as direct cost of the award should be unambiguously indicated, as well as the project title of the candidate, e.g., principal investigator, co-principal investigator or other specific title.

Invited lectures, special honors, or seminar presentations at other institutions should be listed for the previous five years. Service to Department, School, University or external institutions that are professionally relevant should be cited in the curriculum vitae.

C. Annual Reviews of Faculty. The dossier should be supplemented with copies of all annual review letters that were sent to the candidate. Minimally, these written reviews must consist of a letter to the faculty member which contains statements as to whether or not the faculty member's performance in teaching, research and service meet Departmental/School/Regional Campus/University expectations. Detailed comments regarding these areas may be included and should be included in cases where performance does not meet expectation in any area.

D. External Referee Letters. All external referee letters received should be included in the dossier, whether favorable or unfavorable. For each external referee, there should be a brief description of the referee’s academic background, a notation as to who proposed each referee (e.g., the candidate, the program or department chair, the ad hoc committee or standing promotions committee, and/or the Dean), and an indication of any special present or past connections between the referee and the candidate. A minimum of six external letters is required. The six required letters do not include reference letters from other University of Pittsburgh faculty members, with the exception of the Regional Campuses for which a maximum of two letters can come from faculty members on other University of Pittsburgh Campuses.

Referee letters should be sought from well-regarded scholars in similar and/or related fields—again without defining the area too narrowly. A broader net allows a larger pool from which referees can be drawn and also encourages opinions on the impact of the candidate's work on a larger body of scholarship. Six substantive letters constitute a minimum, so that initial requests should be made to nine or ten persons. The candidate should be asked to suggest a number of referees, and a maximum of three letters can be requested from persons on the candidate’s list. Although some referees may be persons who have had previous professional association with the candidate—such as doctoral supervisor, co-principal investigator, or co-author on a major project—most of the reports should be from scholars who know the candidate primarily because of their knowledge of the candidate's work and its impact on his or her field. Referees should be informed that, in accordance with University policy, and with the exception listed below, their letters will be seen only by those participating directly in the decision-making process and, short of a court order or subpoena, every effort should subsequently be made to keep this promise. This means, above all, that letters should be duplicated as little as possible. Court interpretations of the 1978 Pennsylvania Personnel File Act have held that a letter of reference might not be
exempt from employee access if a fee is paid to the writer of the letter. Where no fees are paid, letters are exempt from employee access under current court interpretations. Letters of reference should be solicited by a leading member of the evaluating group. In no case should the candidate be allowed to directly solicit a letter from a referee. As appropriate, external referees should be provided with a curriculum vitae, examples of the candidate’s written work, instructional materials, and other materials upon which their recommendations are to be based. In the case of the creative and performing arts, referees might be invited to exhibits or performances, or they might be selected from among persons who have seen or attended such presentations. If this is not possible, slides or tapes may be submitted to referees. Referees should be asked to make critical judgments about the candidate’s work (possibly mentioning specific items) and on its significance and impact. Further, referees should be asked to compare the candidate with others in the field at a comparable stage of development, preferably by having the writer suggest specific named benchmarks. Finally, it is very helpful and revealing to get answers to the questions as to whether the referee believes that the candidate would be promoted (or achieve tenure) at the referee's own institution and whether the referee would so vote.
The information below provides general guidelines to individuals applying for faculty appointment, promotion, and/or tenure in the Graduate School of Public Health. This document is not a checklist, but encompasses the ideas and goals behind each step in an individual’s progress. The FAPTC reviews proposed faculty actions based on the entirety of the dossier. You should discuss any questions relating to these guidelines with your Department Chair or the Associate Dean for Faculty Affairs.

**INSTRUCTOR:**

*Per the University of Pittsburgh Faculty Handbook:* “The Instructor should have an earned doctorate or the highest appropriate professional degree, or provide evidence that he or she is successfully pursuing such a degree and expects to receive it within a reasonable time.”

The criteria listed below are specific to the Graduate School of Public Health. Please use these only as guidelines.

### Guidelines for Faculty Appointment, Promotion, and Tenure

#### ASSISTANT PROFESSOR:

Per the University of Pittsburgh Faculty Handbook: “The assistant professor should possess a doctorate or appropriate professional degree. An assistant professor should evidence demonstrated teaching ability, substantial experience in advanced study and research, or professional experience of a kind which would enable him or her to make a comparable contribution. He or she should exhibit promise of originality and excellence in some field connected with teaching, writing, research, or the creative arts, and should have demonstrated ability in guiding and counseling students. To be appointed or promoted to an assistant professorship, a person should have the potential for promotion to associate professor.”

The criteria listed below are specific to the Graduate School of Public Health. Please use these only as guidelines.

**ASSOCIATE PROFESSOR:**

Per the University of Pittsburgh Faculty Handbook: “An associate professor should possess a doctorate or appropriate professional degree and have substantial experience in teaching and research or applicable professional experience. The person should show a capacity and willingness to maintain teaching effectiveness and the ability for continued growth as a teacher, scholar, and member of his or her profession. He or she should also have progressed in attaining eminence in a scholarly or professional field. An associate professor must display consistently mature performance in course and curriculum planning, in guiding and mentoring students and junior faculty members, and in participating in the activities of the University.”

The criteria listed below are specific to the Graduate School of Public Health. Please use these only as guidelines.

Evidence that the candidate plays a critical role in the programmatic needs of the department and school.
**Guidelines for Faculty Appointment, Promotion, and Tenure**

**PROFESSOR:**

*Per the University of Pittsburgh Faculty Handbook:* “The rank of professor recognizes the attainment of authoritative knowledge and reputation in a recognized field of learning and the achievement of effective teaching skill. The professor should have attained superior stature in his or her field through research, writing, professional practice, or leadership in professional and learned organizations, as well as having exceeded the standards described for Assistant and Associate Professor ranks.”

The criteria listed below are specific to the Graduate School of Public Health. Please use these only as guidelines.
