

BCHS PhD Research Competency Checklist

To graduate, you are required to demonstrate that you have developed competencies in various research skills. You may develop these skills through your work as a graduate student researcher (GSR), or through other research under the supervision of a faculty member, or through prior experience. The research competencies include participating in research design, project management, data collection, data management, data analysis, and writing for publication. This requirement carries 0 credits. You will need to turn in this form signed by your advisor before graduating.

Area	Description of activity: name of project; approximate dates you performed the work, and description of your specific activities
